

 H5 audits vision: Network Flows visibility technology.

H5 audits R&D team has designed innovative technologies that enable enterprises, service providers and governments to enhance their global network and application visibility. With H5 Appliance, corporations can deploy an “easy to use” and comprehensive software and hardware solution that allows the various teams to access IT information in an adapted format (in regards to their position and expertise). Using a common tool for IT Reporting allows to broadcast a clear and comprehensive information on applications behavior and trending of the network. H5-Appliance provides a powerful network visibility solution for **Network operations center** to pilot the IT, for **Network managers** who are responsible for building and planning growth & IT changes and for **the Helpdesk** interfacing and supporting users with IT issues on daily basis.

 H5 Appliances 1G are available in virtual range. They can be deployed in VMware or Hyper-V environments and hosted in private or public cloud. You can also benefit of their agility in case of an emergency and urgent deployment needs, specially on abroad sites-Virtual appliances allow to avoid international transportation burden.

Available via a valid licence key for a period of 1 month or 1 year, you can position and transfer virtual appliance at any time on your network infrastructure to respond to your production needs and constraints.
