

 H5 audits vision: Network Flows visibility technology.

In order to guarantee Telecoms infrastructure operations, Network managers need visibility on traffic components for each link and to have an efficient detection of any abnormal behaviours. With adequate and customized information, managers can identify quickly performance root-cause problems and validate impact of planned or unforeseen changes onto the network. Having this necessary information, managers can make decisions that are imperative. In one hand, structural savings are possible whilst on the other hand network quality service delivery is enhanced and optimized. This data allows also to identify all used interfaces by a specific flow of your infrastructure or to determine at what point production flows went through backup path.

 H5-Flow Range :

H5-Flow®, Netflow & sFlow collector modules of H5-Performance Reporter show to network engineers how applications traffic impacts network performance. Indeed, by using this network extensive statistics data, NetFlow and sFlow Cisco IOS data that are produced by routers and compatible switches, H5-Flow solutions range is an easy, quick and efficient way to enhance and increase network visibility.

Part Number	<b>H5-flow ENT</b>	<b>H5-flow DC</b>
Form Factor	1U Rack: 43 x 426 x 356 mm	Rack 2U: 89 x 437 x 450 mm
Collection interface	Copper 1x10/100/1000 (optional)	Copper 1x10/100/1000 (optional)
Management interface	Copper 1x10/100/1000	Copper 1x10/100/1000
Remote Access interface	Yes (IPMI)	Yes (IPMI)
Max of collected Netflow interfaces	50 - 100	NA
Total Netflow record / sec Max	100 000	100 000 – 500 000
Storage Capacity for Statistics	1 TB	1 TB
1 min / 5 min / 1 hour / 1-day Data storage	30 days / 3 months / 6 months / 1 year	30 days / 3 months / 6 months / 1 year
Monitored objects	700	1 500
Business Flows	300	500
VLAN	500	1 000
Weight	9 Kg	19 Kg
Power Supply	1 x 260W	2 x 700W
Redundant	No	Yes
Voltage	100-240 Volts	100-240 Volts
