🎯 H5 audits vision: Network Flows visibility technology.

H5 audits R&D team has designed innovative technologies that enable enterprises, service providers and governments to enhance their global network and application visibility. With H5 Appliance, corporations can deploy an "easy to use" and comprehensive software and hardware solution that allows the various teams to access IT information in an adapted format (in regards to their position and expertise). Using a common tool for IT Reporting allows to broadcast a clear and comprehensive information on applications behavior and trending of the network. H5-Appliance provides a powerful network visibility solution for **Network operations center** to pilot the IT, for **Network managers** who are responsible for building and planning growth & IT changes and for **the Helpdesk** interfacing and supporting users with IT issues on daily basis.

🎯 Cyclic Capture : Embedded rolling buffer

The H5-700cc Appliance has additional resources storage 100% dedicated to Network traces storage and history. This new feature allows to drill-down on a specific traffic, or a selected IP or a monitored object to get the associated network trace on a past period; it can be easily exported in a pcap file format. Embedded rolling-buffer is available from 4.0 version. Please contact your sales department for upgrading older versions.
